EDISON PARRA ORTIZ

Developer Frontend and Designer visual

Professional profile.

Frontend developer with experience in web page development projects, using current technological tools such as JavaScript, Reactjs, Nodejs, Html and Css in combination with the skills I have acquired in the field of design using some programs of the adobe suite that allow to improve and make the different graphic character resources that are used in web applications.

I am open to new proposals for projects and jobs where my goal is to work to achieve the objectives proposed by the company or client and also provide added value in terms of innovation and quality.
